

BeerOmeter / WineOmeter

Many of the 10 million people drinking above the recommended limits in the UK alone remain unaware of how much they should be drinking according to the government boffins.

The O meter glasses from Thabto are a fun and entertaining solution to this issue.

Each glass carries markings that clearly display the number of units of alcohol in beverages of varying strength.

The BeerOmeter is a high quality pint glass that displays the number of units of alcohol beer and lager, and the WineOmeter is a wine glass which displays the number of units in wine.

The perfect gift for those who like to enjoy a 'few drinks'.
